# Intelligent technology for today's living

Energy management

Audio video entertainment systems

Security, surveillance  
and home monitoring

Lighting control

Device Control

Climate control

Access management

Live for today...

Your convenience...

Your security...

Your comfort...

Your environment...

Your choice...

After all, it's your lifestyle...

It's your lifestyle...

Affordable

Bespoke

Smart

Innovative

Simple

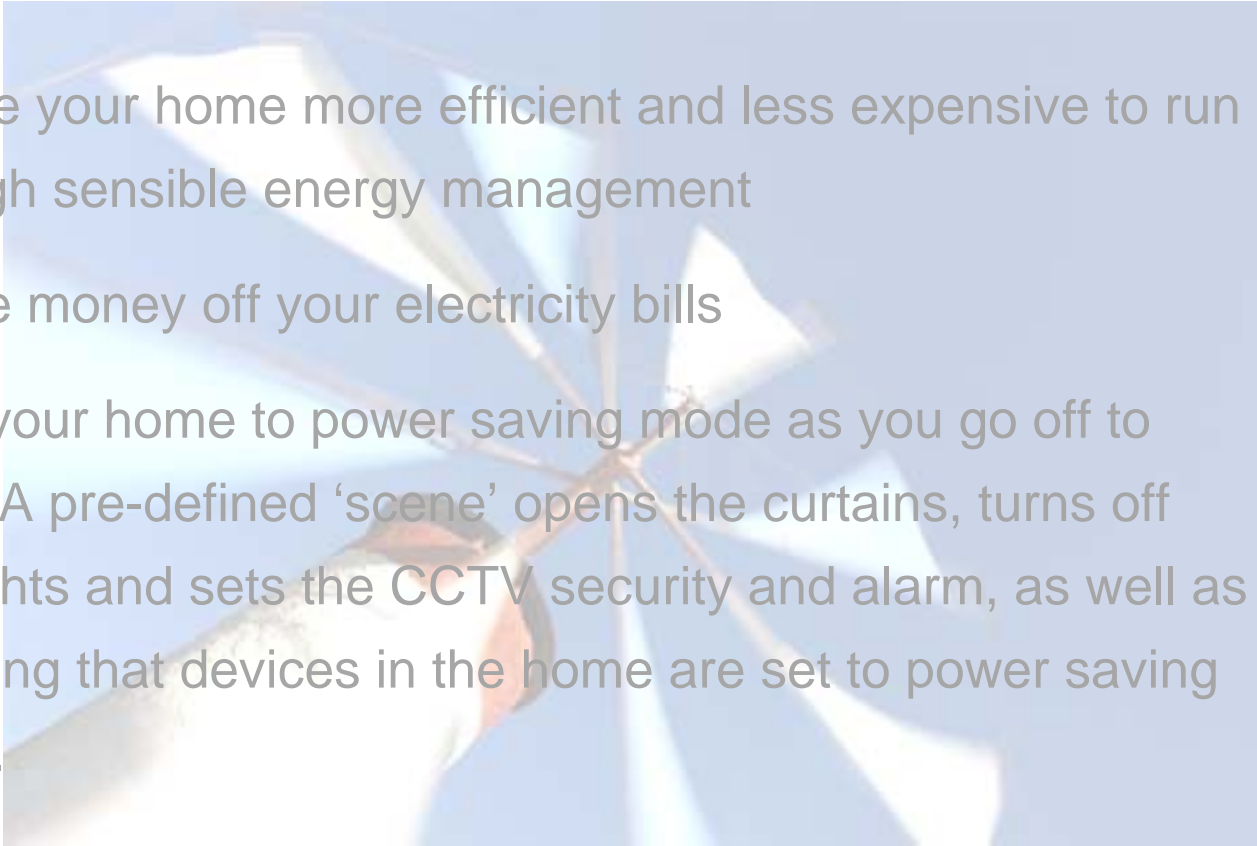

Flexible

Intuitive

## Energy management...

- Make your home more efficient and less expensive to run through sensible energy management
- Save money off your electricity bills
- Set your home to power saving mode as you go off to work. A pre-defined 'scene' opens the curtains, turns off the lights and sets the CCTV security and alarm, as well as ensuring that devices in the home are set to power saving mode.

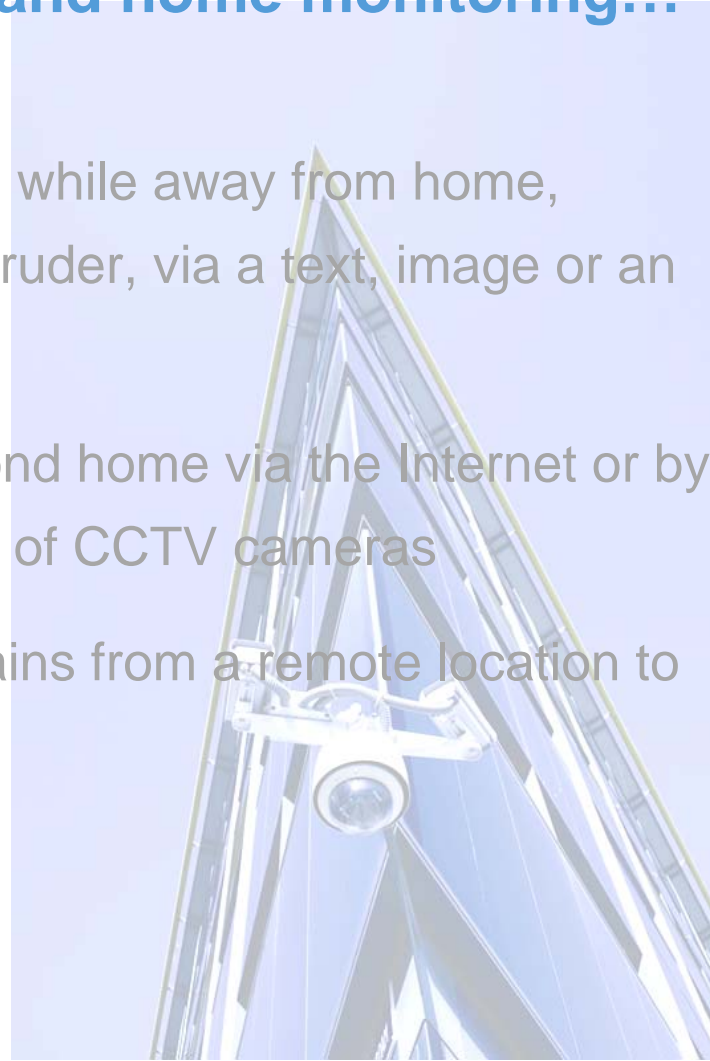

## Lighting control...

- Create powerful lighting effects and program lighting moods for entertaining
- Set your home to 'goodnight mode' – switch off and power down all lights and appliances at the touch of a button
- Set motion sensors to detect presence in the middle of the night and switch on low level lighting to guide sleepy residents to the bathroom

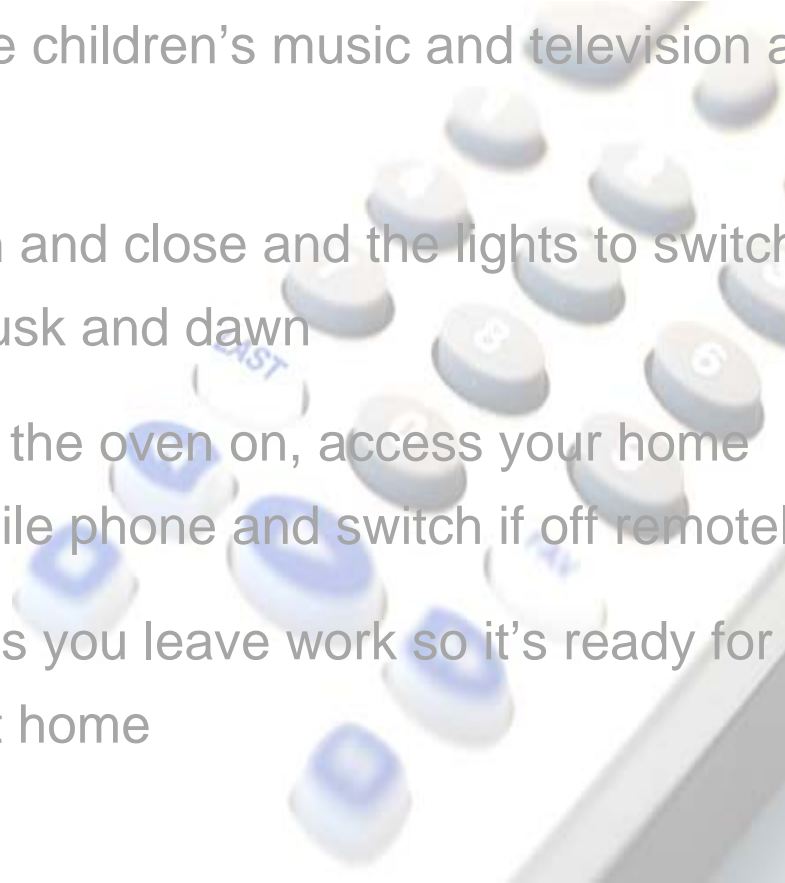

# Security, surveillance and home monitoring...

- Be alerted to any intrusion while away from home, whether smoke, water or intruder, via a text, image or an email
- Keep an eye on your second home via the Internet or by mobile phone via a network of CCTV cameras
- Open and close your curtains from a remote location to simulate occupancy

## Appliance control...

- Automatically turn off the children's music and television at dinner time
- Set you curtains to open and close and the lights to switch on and off every day at dusk and dawn
- If you're worried you left the oven on, access your home via the Internet or by mobile phone and switch it off remotely
- Switch your hot tub on as you leave work so it's ready for you to relax when you get home

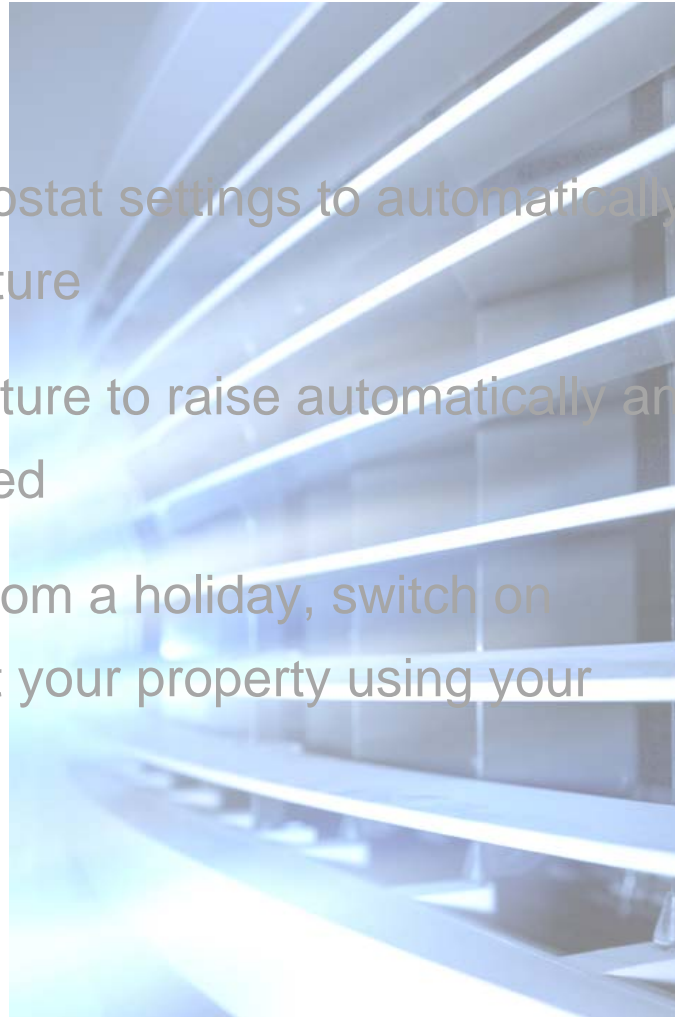

## Audio video entertainment...

- Browse the cover art of your music collection to select your chosen album with an easy indexing and retrieval system for all your music
- Manage audio distribution throughout your home
- Wake up to your favourite track
- Catch up with distant relatives face to face with video communication via Skype or MSN

## Climate control...

- Monitor and change thermostat settings to automatically adjust your home's temperature
- Set your bedroom temperature to raise automatically an hour before you get out of bed
- As you step off the plane from a holiday, switch on heating or air conditioning at your property using your mobile phone

## Wherever you want it...

You can choose one, some or all of the Domia interfaces to interact with your system...

## Touch screens

Manage all your systems and devices from an intuitive, easy-to-use wall panel.

## Television / Windows Media Center (Vista & XP)

No need to get up out of your seat, use your remote control to manage your home through your television.

## Phone

Wherever you are, be it at work or on holiday, Domia Lifestyle allows you to see the status of your home and control it through your mobile phone.

## Internet

Manage your home at any time from any remote location with Internet access.

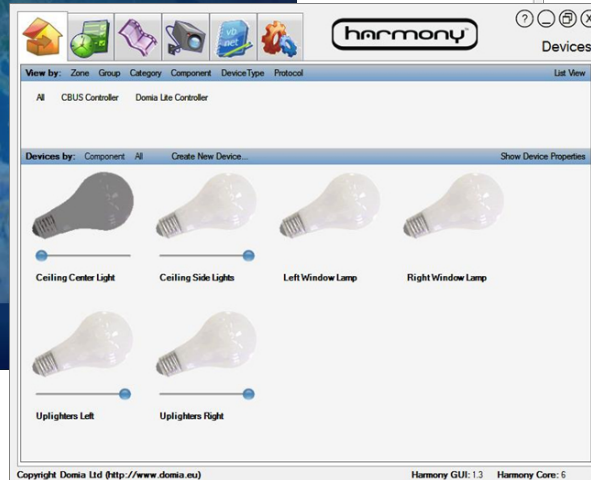

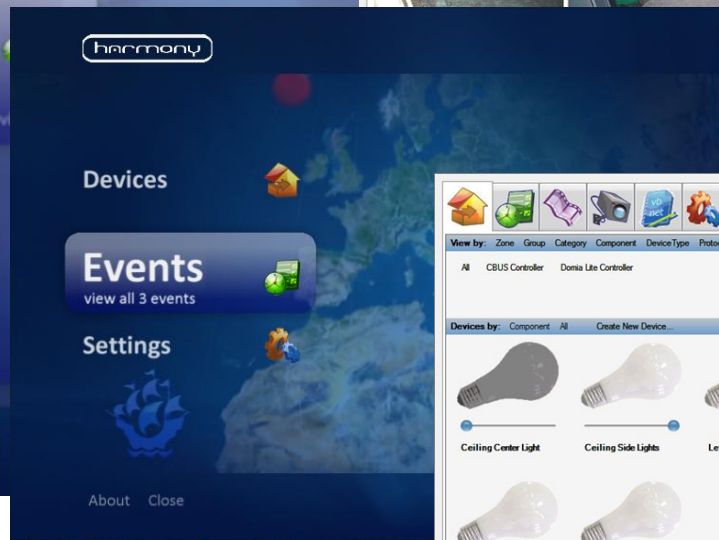

## Voice

Voice control is a convenient and fun way to manage your home. Exceptionally simple to use and speaker independent, the system can be used by multiple people within the same household.

# PC / Computer

Our Windows based software allows you to easily configure, set up and maintain your digital home.

# A day in the life of Domia Lifestyle...

07:00 "Wake up!"

Slowly brightens up the lighting in the room and selects energising music to ease your wake up. Blinds slowly open, boiler kicks into life for a nice warm shower and the kettle boils for an early coffee.

08:30 "Ready for work"

At the touch of a button set your home to "away mode" – lighting and appliances are powered down to save energy while you are out and house is secured through central locking and access control system.

12:00 "Quick check on the house"

Monitor real time image delivered from your CCTV cameras installed within your home via the internet. Mainly for extra peace of mind, after all if intrusion is detected you'll be informed via a text message.

16:00 "Home later than planned"

Set evening lighting to simulate occupancy and delay heating by an hour to save energy.

# A day in the life of Domia Lifestyle...

18:00 "Back Home"

And the house knows you are! The oven is now warming for dinner and mood lighting has been set for a special evening.

19:30 "Guests Arrive"

Scan through the cover art of your CD collection for appropriate music. Play exactly what you want to play in each room of the house.

23:30 "Goodnight"

It's bedtime and at a touch of a button simply "switch off" your house. Courtesy lighting guides you to the bathroom based on motion sensors during the night. Rest easy knowing you are protected by a variety of sensors such as fire, gas and water all controlled via your Domia Lifestyle solution.

## Making a difference...

Domia Ltd is Europe's leading developer of home automation software, hardware and lifestyle systems.

Domia's goal is to make home automation flexible, simple and comprehensive by offering a completely integrated lifestyle product range.

The company integrates a vast array of smart applications such as audio & video, lighting, climate control (HVAC), security and surveillance into complete and affordable digital home solutions.

## So what makes us different...

Because our core software is integrated with existing world class technologies from Microsoft and Intel, we can provide superior and/ or unique user interfaces such as Vista MCE, mobile phone and web interfaces.

Because we use other people's known technology platforms, our systems require less training to use and are more intuitive than competitors.

Our middleware software is very flexible allowing you to use any equipment, in any system, from any supplier – seamlessly.

# Why Become a Trade Reseller.....?

- By attaining trade status you will have access to the reduced purchase prices
- Access to the training courses and invitations to the quarterly seminars, these are designed to highlight the new products in development and an opportunity to discuss current products
- Varying routes-to-market, you can opt to sell direct to the end-user and also serve the Installer market

# Training is a must....WHY?

- If you want to get more from your smart home installations, and benefit from installing successful systems that customers love and recommend to their friends, you need to get the installation done correctly, first time, every time.
- The components of the course are designed to work together to form a modular solution, suitable for almost any custom AV installation and offering a large degree of flexibility both in terms of price and function
- Successful completion of the mandatory modules allows you to register as a “Domia Lifestyles Qualified Installer”, becoming a DLQI entitles you to:
  - Extended 2 year guarantee
  - Referred leads from Domia Lifestyle’s extensive marketing and promotional programmes.
  - Direct access to the Development Team
  - Access to the new development hardware and beta software
  - First to receive new updates and preferential access to newly released product
